CYCLESAFE BICYCLE LOCKER SYSTEMS
PROPARK® SERIES

Setting the Standard for Secure Bicycle Parking

CycleSafe
SECURE BICYCLE PARKING
What is a CycleSafe Bicycle Locker?

A bicycle locker is like a garage for your bike. Bicycle lockers provide excellent, secure bicycle parking by providing protection from theft, vandalism, and inclement weather. The lockers are designed to accommodate one bicycle per door along with gear such as panniers, lights, helmets, etc.

CycleSafe creates key-leading products with high quality materials that support sustainable solutions, manufactured to ISO 9000/14000 quality and environmental standards. Products that last longer enable societies to conserve resources with a lower impact on the environment with energy efficiencies and ease material management.

Users receive one key that opens one locker. Each locker has a unique lock and key to provide maximum security. Key duplication is restricted to authorized users only.

Many bicycle parking is available with CycleSafe SmartLock® Wireless System. This innovative technology allows wireless management of multiple lockers with existing keyway and keypad accessed.

Cydists reserve a locker with a rental application for long or short term use from your local Bike Parking Administrator. Locker management recommendations with sample rental agreements, marketing programs and database management are available to implement your program.

CycleSafe enhances communities with green building products to provide peace of mind for the cyclist and the owner.

About CycleSafe, Inc.

CycleSafe is the #1 choice of cyclists and facility managers worldwide.

CycleSafe, Inc. is the #1 choice of cyclists and facility managers worldwide. CycleSafe supports several organizations that promote bicycle advocacy and alternative transportation, which contribute to being an active participant in creating a safer, healthier environment and society.

About CycleSafe, Inc.

CycleSafe is the #1 choice of cyclists and facility managers worldwide. CycleSafe supports several organizations that promote bicycle advocacy and alternative transportation, which contribute to being an active participant in creating a safer, healthier environment and society.

Sponsors of:

3D Integrated U-bolt maximizes strength and stiffness
3. Washed rollover resist rain rollback and weather resistance
4. Industrial anti-theft casting meets graffiti and provides superior UV protection
5. ID plate identifies each locker by number
6. Lock surround plate in stainless steel protects the lock from attack
CycleSafe Preference Specifications:

1. Reinforced composite outward panel resist scratches, punctures, abrasion, and vandalism
2. Integral 2” ribbing maximizes strength and stiffness
3. Vaulted roof promotes rain runoff and weather resistance
4. Industrial anti-theft casting meets graffiti and provides superior UV protection
5. ID plate identifies each locker by number
6. Lock surround plate in stainless steel protects the lock from attack.

Space efficient bike lockers are engineered and designed for a lifetime of everyday use.

Fitting all standard bicycles, dimensions are 4' (1.2m) high X 6' 6" (2.0m) deep X 3' 3" (0.9m) wide.

CycleSafe locker components are designed for a lifetime of everyday use.

CycleSafe locker components are designed for a lifetime of everyday use.

Concealed piano hinge is full-length and recessed lock area.

Sustainable Manufacturing

CycleSafe system and support services are built on sustainability. CycleSafe products are environmentally sustainable and meet ISO 9000, 14000 requirements.

CycleSafe Preference Specifications:

1. Reinforced composite outward panel resist scratches, punctures, abrasion, and vandalism
2. Integral U-bolt maximizes strength and stiffness
3. Washed rollover resist rain rollback and weather resistance
4. Industrial anti-theft casting meets graffiti and provides superior UV protection

CycleSafe is committed to being an active participant in creating a safer, healthier environment and society.

CycleSafe is the #1 choice of cyclists and facility managers worldwide.
The bicycle locker pioneer: CycleSafe lockers are engineered with high strength poly-resin composites with the high impact resistance of structural steel. The benchmark in secure bicycle parking, CycleSafe offers the most secure, versatile and cost effective bicycle locker to outperform and outlast the competition.

Our quality manufacturing standards produce a rigid structure that ships knocked down in kit form for ease of assembly for reduced freight, or pre-assembled and shipped upon request.

Product Overview

The ProPark® series by CycleSafe is a modular, interlocking locker system that stores bikes and gear in a weatherproof, fire-retardant, vandal-deterrent structure. A standard unit has a door on each side with a diagonal interior partition, creating two triangular stalls to stow bikes horizontally with handlebars near the door. This modular system can be configured to meet any site's specifications, designed to be flexible, to accommodate future expansion. Models and features may include:

- Single-Sided Access (limited access)
- Double-Sided Access (standard model)
- CycleSafe Electronic Access Door (long term/short term keyless entry)
- Double-Tier Locker (high capacity)
- Display Side Panels (marketing and communications)
- Storage Bins (cyclists' gear)

Setting the Standard for Secure Bicycle Parking

- Awarded the first bicycle storage patent issued in the U.S.
- Industry's most durable locker, with a 30-plus year proven product life
- Selected by more North American transit agencies, corporations, and institutions than any other cycle storage unit
- Five-year limited warranty
- Manufactured to ISO 9001 and 14000 international quality
- Contributes to LEED certification
- Made in the USA

For more information, call us at 888-950-6531.
Know the CycleSafe Difference

CycleSafe takes pride in engineering products for the best performance—both for the locker owner and for the cyclist.

Security
- **Unmatched durability.** CycleSafe ProPark® series lockers are made of high-density polyester SMC (sheet molding compound) with long-glass fiber reinforcement. This impact-resistant, flame-retardant composite material will not crack, dent, warp, corrode, or sustain UV degradation. With more than 70 percent mineral content, our proprietary composite is one of the strongest structural materials available and the most durable composite used in the locker industry. Hardware is also selected for quality, with all exposed metal made of stainless steel.
- **Secure design.** The patented interlocking design incorporates structural features that make it secure against pry bars, knives, weather, and fire—problems that often plague other bike storage products.
- **Superior locks.** The standard lock is a pop-out T-handle mechanism with an Abloy® high-security locking cylinder—one of the best exterior locksets on the market. Abloy locks use a key-control system that prohibits key copying except through a certified service center. (Other brands available upon request only)

Versatility
- **Appearance.** Clean lines, neutral colors, and custom design options and finishes make CycleSafe lockers compatible with any architectural setting.
- **Space.** Efficient interior space of only 10 sq. ft. per locker accommodates even large bikes, scooters, or personal mobility transports. Promotes site sustainability—as many as 20 bikes can be stored in the area of a single parking space using our double tiered systems.
- **Options.** A wide variety of configuration, lock, and accessory options provide solutions for any site.
- **For the future.** Modular system flexibility allows for future relocation, expansion, or upgrade. Double your capacity by adding a double tier or upgrade to electronic access.

Beyond conventional materials, thermoset composites unique properties are engineered for demanding applications.

Lowest Lifecycle Cost
- **Durable.** While other bike lockers warp, crack, rust, fade, and sag, our industrial-grade lockers look and perform like new after decades of use.
- **Flame-resistant.** Some lockers on the market go up in flames when ignited; ours are rated self-extinguishing. A very important feature to know that even an isolated fire will not travel to surrounding lockers.
- **Low-maintenance.** Maintenance is as simple as an occasional cleaning, and our coating has graffiti-resistant properties to allow for easy removal and restoration to original finish.
- **Smart investment/Cost sharing Programs.** Leverage your return on investment in CycleSafe through locker rental, leasing programs and advertising on display end panels.

Contact CycleSafe for specifications and certifications on our engineered products.

Accessories

Outfit your lockers with any number of special features based on site/user demands. Options include:

- **#10635 Door check/holdback kit** for propping door open, allowing unrestricted access
- **#10790 Coat hook, partition mounted, for hanging personal items—(2 double hooks per order)**
- **#10768 Door mounted 4-1/2" x 5" stainless steel louvered vent to reduce heat, mold, mildew in extreme climates.**
- **#19901 · 24" x 60"**
- **#19905 · 44" x 72"**
  PosterGrip® snap-in aluminum frame for displaying ads, maps, etc. on display end panel:
- **#10789 Door-mounted storage bin for non-View Thru models only**
- **#10689 Aluminum mounting plate.**
- **#10755 Interior door brace for asphalt/non-concrete surface**
- **#10670 Floor panel, for SM/02**
- **#10698 Door mounted 4-1/2" x 5" stainless steel louvered vent to reduce heat, mold, mildew in extreme climates.**
- **#10689 Bicycle parking decals**
- **Fastener detail**
- **Available by special order**
  - Solar panel kit for electric bike charging station
  - #10020 CycleManager® CD-ROM for locker program administration

info@cyclesafe.com    888-950-6531     www.cyclesafe.com
CycleSafe offers a full line of locking options to fulfill your locker access control & key management needs. Solutions include:

- **#10605 Standard T-Handle removable plug lock to Abloy® Exec Series Maximum Security vending cylinder lockset (UL 437 rated) with factory restricted keys, w/3 keys provided, keyed different. Disc tumbler cylinder contains few moving parts and offers picking and environmental resistance. The steel bolt provides maximum resistance against attack by pulling. Nickel/silver key w/ heavy duty polymer key bow.**

- **#10607 Upgrade T-Handle removable plug lock to Abloy® Exec Series cylinder w/masterkeying. Abloy’s® unique rotating disk locking mechanism provides master-keying possibilities and superior resistance to corrosion, manipulation and attack.**

- **#19536/19535 Compact vending type Pop-out heavy duty T-Handle with chrome finish and 7 pin tubular Chicago Ace II removable lock cylinder, brass chrome finish w/2 keys, available keyed different. Quality at affordable price.**

- **#11880 Exterior mount GE Key-Safe Box. Stores keys for short term on-demand use with programmable coded access per door.**

- **#10651 Velox, Hanging File to Index Keys**

- **#10792 Exterior Lock Weather Shield – protects lock in high moisture or low temperature environments shown w/door ID plate option**

- **#10720 Padlockable Handle with spring return includes bracket to secure user supplied padlock or bicyclist U-Lock (cyclists or owner to provide lock) to replace T-Handle. Zinc coated/heavy duty construction handle or stainless steel handle upon request. Intended for open-access bicycle lockers.**

- **#15600 ProPark Door with Trilogy Lock by Alarm Lock (PDL 6100) with proximity Smart Card (HID) or Pin combination to replace T-Handle. Intended to provide restricted access for allocated use.**

Information for available products such as CycleSafe Systems, University of Washington Manager of Transportation Michael Williams, on the market.

**Without hesitation we recommend CycleSafe as the best bike locker on the market.**

Michael Williams, Manager of Transportation Systems, University of Washington

---

“...we've had years of experience with five or six other bike locker brands, and CycleSafe provides the best quality.”

Angela Rae, Trip Reduction Administrator, Apple Computer
Since facility needs and requirements vary, CycleSafe offers a full range of models, upgrades, and accessories for our locker system.

**Standard Model (SM)**
The industry standard for bicycle commuters, this system accommodates two bicycles, one per door. This Standard model is the basis for all the CycleSafe models and supports the Security and Quality claims. Units are modular and may be expanded or upgraded to accommodate site or program requirements.

**Door-View Model (DV)**
The Door View model provides managers the ability to monitor locker contents or usage without allowing a full public view. It features a framed 11" x 11" polycarbonate window in the door.

**Side-View Model (SV)**
The end panels on the Side View model have weatherproof, shatterproof polycarbonate inserts 23" x 60" that make the locker contents instantly visible for security purposes — and for locating an available locker. A polycarbonate interior partition allows a clear view through a row of lockers. Perforated metal or other architectural materials may be specified.

**View-Thru Model (VT)**
This model offers full view thru, combining a window in the door, end panels and interior partitions to allow full public view of contents and locker availability. Polycarbonate is the standard material for viewing, perforated metal inserts can be substituted for minimizing visibility.

**Double-Tier Model (DT)**
The Double Tier model offers maximum space efficiency to double the bike parking capacity by stacking a second locker on top of a lower locker. Similar to lifting a bike on a car roof rack, twice as many lockers can be added without increasing the footprint. The lock mechanism is located at the base of the upper door for easy access. A door check holdback mechanism props the door open for ease of entry. A retrofit kit is available to add double tier units to existing locations. Double Tier units measure approximately 101" in height, and can be specified with Door View windows.

**Structural Options**

**Display Panel Options**
CycleSafe’s display end panels give users unlimited options for integrated communications or architectural enhancements.

- **Communications:** The recessed portion of the end panel (24" x 60") allows you to incorporate promotional messages, including custom logos and transit maps, or to sell revenue-generating ad space. Our most popular design incorporates an aluminum poster grip frame, making it easier to interchange promotional formats. Other display formats include adhesive labels, backlit panels, and programmable LED displays.

**Interior Partition Options**
The standard interior partition is made of OSB, end panels and interior partitions to allow full public view of contents and locker availability. Polycarbonate is the standard material for viewing, perforated metal inserts can be substituted for minimizing visibility.

**Smartloc™ CycleSafe Keyless Access**
This CycleSafe Smartloc design provides cyclists user access to lockers with a plethora of benefits.

- **Administrative monitoring & reporting**
- **Revenue generating via hourly, daily, or monthly use rentals.**
- **Further revenue opportunities through bike or personal mobility device rentals.**
- **Automated credit/debit card billing directly to the end user.**
- **Increased locker occupancy rates by enabling multi-user access to each locker.**
- **Identify and track users through online membership database.**
- **Eliminates need for management of door key distribution and locker assignment.**

**Smartloc Electronic Access end user Benefits:**

- **Keyless access, on demand use.**
- **Safe secure and flexible program for parking bikes.**
- **24/7 online availability and reservation capabilities.**
- **Unique key code combinations for each access event.**
- **Convenient & inexpensive means to protect your valuable bicycle transportation.**

For further information contact info@cyclesafe.com or your local representative for details.
**Structural Options**

Since facility needs and requirements vary, CycleSafe offers a full range of models, upgrades, and accessories for our locker system.

**Standard Model (SM)**

The industry standard for bicycle commuters, this system accommodates two bicycles, one per door. This Standard model is the basis for all the CycleSafe models and supports the Security and Quality claims. Units are modular and may be expanded or upgraded to accommodate site or program requirements.

**Door-View Model (DV)**

The Door View model provides managers the ability to monitor locker contents or usage without allowing a full public view. It features a framed 11” x 11” polycarbonate window in the door.

**Side-View Model (SV)**

The end panels on the Side View model have weatherproof, shatterproof polycarbonate inserts 23” x 60” that make the locker contents instantly visible for security purposes — and for locating an available locker. A polycarbonate interior partition allows a clear view through a row of lockers. Perforated metal or other architectural materials may be specified.

**View-Thru Model (VT)**

This model offers full view thru, combining a window in the door, end panels and interior partitions to allow full public view of contents and locker availability. Polycarbonate is the standard material for viewing, perforated metal inserts can be substituted for minimizing visibility.

**Double-Tier Model (DT)**

The Double Tier model offers maximum space efficiency to double the bike parking capacity by stacking a second locker on top of a lower locker. Similar to lifting a bike on a car roof rack, twice as many lockers can be added without increasing the footprint. The lock mechanism is located at the base of the upper door for easy access. A door check holdback mechanism props the door open for ease of entry. A retrofit kit is available to add double tier units to existing locations. Double Tier units measure approximately 101” in height, and can be specified with Door View windows.

**Single-Side Access Option**

If your site plan requires lockers to be placed against a wall due to limited space, choose the Single Sided Access option. Each locker provides parking for one or two bikes, with a fixed rear panel with no interior partition. This model can also be specified with or without windows for viewing contents or locker availability. See chart on page 11 for ordering details.

**Display Panel Options**

CycleSafe’s display end panels give users unlimited options for integrated communications or architectural enhancements.

- **Communications**: The recessed portion of the end panel (24” x 60”) allows you to incorporate promotional messages, including custom logos and transit maps, or to sell revenue-generating ad space. Our most popular design incorporates an aluminum poster grip frame, making it easier to interchange promotional formats. Other display formats include adhesive labels, backlit panels, and programmable LED displays.

**Interior Partition Options**

The standard interior partition is made of OSB, to compliment the exterior color scheme. Other architectural materials may be specified.

**Smartloc™ CycleSafe Keyless Access**

This CycleSafe Smartloc design provides cyclists user access to lockers with a plethora of benefits.

- **Administrative monitoring & reporting**
- **Revenue generating via hourly, daily, or even monthly use rentals.**
- **Further revenue opportunities through bike or personal mobility device rentals.**

- **Secure design.** The patented interlocking design incorporates structural features that make it secure against pry bars, knives, weather, and fire—problems that often plague other bike storage products.
- **Superior locks.** The standard lock is a pop-out T-handle mechanism with an Abloy® high-security locking cylinder—one of the best exterior locksets on the market. Abloy locks use a key-control system that prohibits key copying except through a certified service center. (Other brands available upon request only)

Versatility
- **Appearance.** Clean lines, neutral colors, and custom design options and finishes make CycleSafe lockers compatible with any architectural setting.
- **Space.** Efficient interior space of only 10 sq. ft. per locker accommodates even large bikes, scooters, or personal mobility transporters. Promotes site sustainability—as many as 20 bikes can be stored in the area of a single parking space using our double tiered system.
- **Options.** A wide variety of configuration, lock, and accessory options provide solutions for any site.
- **For the future.** Modular system flexibility allows for future relocation, expansion, or upgrade. Double your capacity by adding a double tier or upgrade to electronic access.

Beyond conventional materials, thermoset composites unique properties are engineered for demanding applications.

Lowest Lifecycle Cost
- **Durable.** While other bike lockers warp, crack, rust, fade, and sag, our industrial-grade lockers look and perform like new after decades of use.
- **Flame-resistant.** Some lockers on the market go up in flames when ignited; ours are rated self-extinguishing. A very important feature to know that even an isolated fire will not travel to surrounding lockers.
- **Low-maintenance.** Maintenance is as simple as an occasional cleaning, and our coating has graffiti-resistant properties to allow for easy removal and restoration to original finish.
- **Smart investment/Cost sharing Programs.** Leverage your return on investment in CycleSafe through locker rental, leasing programs and advertising on display end panels.

Contact CycleSafe for specifications and certifications on our engineered products.

Accessories

Outfit your lockers with any number of special features based on site/user demands. Options include:

- **#10635 Door check/holdback kit** for propping door open, allowing unrestricted access
- **#10790 Coat hook, partition mounted, for hanging personal items**—(2 double hooks per order)
- **#10768 Door mounted 4-1/2” x 5” stainless steel louvered vent to reduce heat, mold, mildew in extreme climates.**
- **#19901 - 24” x 60”** PosterGrip® snap-in aluminum frame for displaying ads, maps, etc. on display end panel:
- **#19905 - 44” x 72”**
- **#10689 Aluminum mounting plate.**
- **#10755 Interior door brace for asphalt/non-concrete surface**
- **#10670 Floor panel, for SM/02**
- **#10679 Door-mounted 4-1/2” x 5” stainless steel louvered vent to reduce heat, mold, mildew in extreme climates.**
- **#15800 Power Center – GFI electrical outlet for charging Electric Bikes or other accessories**
- **#10768 Door mounted 4-1/2” x 5” stainless steel louvered vent to reduce heat, mold, mildew in extreme climates.**
- **#10790 Coat hook, partition mounted, for hanging personal items**—(2 double hooks per order)
- **#19901 - 24” x 60”** PosterGrip® snap-in aluminum frame for displaying ads, maps, etc. on display end panel:
- **#19905 - 44” x 72”**
- **#10689 Aluminum mounting plate.**
- **#10755 Interior door brace for asphalt/non-concrete surface**
- **#10670 Floor panel, for SM/02**
- **#10679 Door-mounted 4-1/2” x 5” stainless steel louvered vent to reduce heat, mold, mildew in extreme climates.**

Available by special order
- Solar panel kit for electric bike charging station
- #10020 CycleManager® CD-ROM for locker program administration

info@cyclesafe.com     888-950-6531     www.cyclesafe.com
The bicycle locker pioneer: CycleSafe lockers are engineered with high strength poly-resin composites with the high impact resistance of structural steel. The benchmark in secure bicycle parking, CycleSafe offers the most secure, versatile and cost effective bicycle locker to outperform and outlast the competition.

Our quality manufacturing standards produce a rigid structure that ships knocked down in kit form for ease of assembly for reduced freight, or pre-assembled and shipped upon request.

Product Overview
The ProPark® series by CycleSafe is a modular, interlocking locker system that stores bikes and gear in a weatherproof, fire-retardant, vandal-deterrent structure.

A standard unit has a door on each side with a diagonal interior partition, creating two triangular stalls to stow bikes horizontally with handlebars near the door. This modular system can be configured to meet any site’s specifications, designed to be flexible, to accommodate future expansion. Models and features may include:

- Single-Sided Access (limited access)
- Double-Sided Access (standard model)
- CycleSafe Electronic Access Door (long term/short term keyless entry)
- Double-Tier Locker (high capacity)
- Display Side Panels (marketing and communications)
- Storage Bins (cyclists gear)

Setting the Standard for Secure Bicycle Parking
- Awarded the first bicycle storage patent issued in the U.S.
- Industry’s most durable locker, with a 30-plus year proven product life
- Selected by more North American transit agencies, corporations, and institutions than any other cycle storage unit
- Five-year limited warranty
- Manufactured to ISO 9001 and 14000 international quality
- Contributes to LEED certification
- Made in the USA

Versatile System Solutions

At a transit hub, on campus, or at the office, CycleSafe lockers promote community health and fitness.
Complete Parking Solutions

To complete your bicycle parking program, CycleSafe offers a full line of secure bicycle parking products, including lockers, racks, and shelters. Our range of materials, technologies, and processing knowledge is unmatched in the industry.

Part # Model Description
SM-S01 SM No Windows
SM-M02 SM DV Windows in Doors
SM-S06 SM SV Windows in Sides
SM-M12 SM VT Windows in Doors & Sides
DT/SM-M04 DT SM-M02 SM DV SV VT LB KG
DT/SM-S02 DT/SM-S02 SM DV SV VT LB KG

All locker systems are 4’6” high x 6’6” deep x length listed in chart below.

SM = Standard Model, Two Door
DV = View Thru Door
SV = Side View
VT = View Thru/Full
DT = Double Tier
SM-S01 – one door access for 1-2 bikes
SM-S06 – one door access for 6 bikes
SM-M02 – two door access for 2 bikes
SM-M12 – two door access for 12 bikes
Also available:
DT/SM-M04 – double-tier 4 door access for 4 bikes
DT/SM-S02 – two door single access for 2 bikes (not shown)

What is a CycleSafe Bicycle Locker?
A bicycle locker is like a garage for your bicycle. Bicycle lockers provide excellent, secure bicycle parking by providing protection from theft, vandalism and inclement weather. The lockers are designed to accommodate one bicycle per door along with gear such as panniers, lights, helmets, etc.

CycleSafe creates key locking products with high-quality materials that support sustainable solutions, manufactured to ISO 9000/14000 quality and environmental standards. Products that last longer enable society to conserve resources with a lower impact on the environment with energy efficiencies and waste material management.

Users receive one key that opens one locker. Each locker has a unique key to provide maximum security. Key duplication is restricted to authorized users only.

Bicycle parking is available with CycleSafe Smartlock® Wireless System. This innovative technology allows wireless management of multiple lockers with existing security and linked access.

Cydrole, a key locker with a rental application for long or short term use from your local Bike Parking Administrator. Locker management recommendations with sample rental agreements, marketing programs and database management are available to implement your program.

CycleSafe enhances communities with green building products to provide peace of mind for the cyclist and the environment.

About CycleSafe, Inc.
CycleSafe is the #1 choice of cyclists and facility managers worldwide. CycleSafe serves planners for transit, education, corporate, government, and healthcare facilities by providing bicycle parking solutions with the best in quality, innovation, and reliability. Our products help achieve healthy and sustainable communities and increase employee productivity, retention and retention.
