

BIKE CHECK™

BY CYCLESafe

PORTABLE RACK
BIKE PARKING
FOR EVENTS

- CITY FESTIVALS
- COLLEGE ATHLETIC GAMES
- OUTDOOR FUND RAISING EVENTS
- BICYCLE TOURS
- CONCERTS

The CycleSafe Bike Check™ is the ultimate portable event bicycle parking solution developed in response to requests from a leading bicycle advocacy organization. Bike Check provides everything you need for high-capacity, easy to transport and store event parking.

Flexible Design

The Bike Check's modular design offers unlimited configurations to meet your space requirements indoors or out, and will accommodate road bikes, mountain bikes, commuter bikes, or kids bikes with ease. Base footings have mounting holes to anchor to the ground for additional stability. The Bike Check is ideal for city festivals, sporting or fund raising events, concerts, bicycle tours or any event to encourage community cycling.

Easy to Use

The Bike Check features an interlocking design, with modular components, so it can be easily assembled by hand without tools. The telescoping tubular design allows for quick assembly and dismantling. Identification flags can be specified for easy location of multiple sections or sectional side panels can be added for additional promotion or identification. The 8-foot support bar and triangular frame disassemble for quick transport by standard van or SUV, and does not require much storage space. The Bike Check can be configured for use with security loop options, allowing cyclists to use their own D locks to secure their bicycle for unsupervised locations.

Durable and Light Weight

True to the design of CycleSafe products, Bike Check components are protected by a metallic silver TGIC polyester powdercoat that won't damage the bike finish and ensures years of usability. This tough design provides security you can rely on, but is light enough to move during set-up, making it the premiere portable secure bicycle parking solution available.

*Bike-Check™
can make event
bike parking a suc-
cess. Easy to transport
and store and create fund-
raising opportunities.*
