

EASY LOADING  
EASY LIFTING  
EASY LOCKING

## Cycle-Safe Hi-Density Rack System:

For minimum space requirement, the Quad-Rack™ offers maximum bike parking with two tier capacity. Easy to load, simply place bike into the innovative wheel guide and roll along the channel to secure the wheel and frame in place. Bicycles can be locked with a pivot locking bar for added security with high quality cyclist provided U/Lock.

Each Quad-Rack™ allows double-tier parking to hold (4) bicycles, the modular design allows for one or two sided capacity with multiple configurations to customize for any location. Easy to assemble and reconfigure, constructed with zinc primer silver TGIC polyester powder coat finish steel tubing and UV plastic wheel gutters for durability.

Minimal moving parts also reduce access aisles needed with less maintenance or liability concerns associated with moveable tray racks. The Quad-Rack™ requires less lifting when the bike wheels are rolled on to the top channel rather than lifting a tray and full bike.

Space efficient with minimum clearance required above, 96 inches. Recommended aisle widths of 6 ft, center to center bike dimensions are 18 inches. This high-low staggered two tier system organizes most bikes with a user friendly compact design.

(2) Quad-Rack Systems shown.  
4-bike capacity each.  
Total 8-bike capacity.

These racks are the perfect solution for bike rooms or covered bike parking when combined with our bike shelters. The ideal way to organize bikes in compact areas such as employment sites, multi-family, train stations, shopping centers or campuses.

### FEATURES

- Space efficient high capacity bike parking
- Standard zinc primer silver TGIC polyester powder coat
- Modular for many configurations
- 45 degree parking | single-sided | double-sided parking
- 4-bikes each side are offset high-low
- Duo-Rack™ single-floor level parking
- Shelter options are available

### BENEFITS

- Cost effective
- Long product life
- High security and stability
- Easy to operate
- Flexible design
- Suitable for indoor or outdoor use
- Compatible with Cycle Safe Bicycle Shelters
- Accommodates most types of bikes

Pivoting Lock Bar

Staggered High-Low Design

# QUAD-RACK™

## DIMENSION DRAWINGS:

Product: Quad-Rack Hi-Density Rack  
 Capacity: Each section holds 4 bicycles, modular for expansion  
 Material: Silver Powdercoat steel with extruded PVC channels  
 Recommended Lock: High quality U/Lock or chain  
 Custom Colors: On request
