Cycle-Safe WallRack™ System:

WallRack™ System holds (1) bike with built-in locking capability, a secure and economical solution for storing bikes. The WallRack vertical storage system is space efficient, parking the bike against a wall which opens up floor space while allowing easy accessibility. The versatile WallRack design is suitable for indoor or outdoor use, available in four polyester powdercoat finishes or stainless steel.

The old "J" hooks create stress on the wheelsets of bike rims found on today's bicycles. Wall-Rack supports the bike's front wheel in a configuration that avoids damage, while allowing the use of a cyclist's lock to secure the frame and wheel to the rack.

Simply roll the bike up to the WallRack and place the front end of the bike and its front wheel within the rack. This easily allows the use of a variety of locks and ability to attach gear.

FEATURES & BENEFITS

- Heavy duty 3/8" steel wire frame.
- Two mounting holes 12" apart for 5/16" dia. lag screw type fasteners 16" O.C., 12" offset to allow for handlebar clearance.
- Two tamper resistant 5/16" lag screws are included.
- 5/16" lag shield for concrete installations are included.
- Create additional space efficiency with 45° angle kit.
- Durable polyester powdercoat finish in several standard colors, silver, black, red, blue, or stainless steel finish.
- WallRack allows attachment of other bicycle gear such as helmets, gloves or other accessories.
- Protects the bike frame and finish.
- Allows clearance for pedestrian pathways or storage.
- Custom colors available upon request.
- Easy to install, simple to use.

MULTIPLE MOUNTING OPTIONS

- Mounting WallRack to wall studs on 16" centers is typical.
- Combine WallRack with 45° angle mounting brackets to increase pedestrian walkways.
- Transit Rack System available with stability strap mounted on a sturdy galvanized frame.
- Contact Cycle-Safe for additional multiple mounting options.

Dimensions:

Product: CycleSafe WallRack part# 17502
Capacity: Holds 1 bike
Finish: Durable polyester powdercoat finish, Red, Blue, Black or Silver, Stainless Steel upon request
Mounting: Wood (furnished): 2 - 5/16" lag wood screws, 12" O.C.
          Concrete/Block: 5/16" lag shield upon request

ORDER INFORMATION:

- WallRack part# 17502 (R)red, (BL)blue, (BK)black, (S)silver
- Extra Mounting lag screw part# 17505
- Stainless Steel WallRack part# 17503
- Stainless Steel WallRack part# 17504
- 45° Angle bracket kit part# 17513

Multicyle Parking Solutions

WallRack™ System holds (1) bike with built-in locking capability, a secure and economical solution for storing bikes. The WallRack vertical storage system is space efficient, parking the bike against a wall which opens up floor space while allowing easy accessibility. The versatile WallRack design is suitable for indoor or outdoor use, available in four polyester powdercoat finishes or stainless steel.

The old “J” hooks create stress on the wheelsets of bike rims found on today’s bicycles. WallRack supports the bikes’ front wheel in a configuration that avoids damage, while allowing the use of a cyclists lock to secure the frame and wheel to the rack.

Simply roll the bike up to the WallRack and place the front end of the bike and its front wheel within the rack. This easily allows the use of a variety of locks and ability to attach gear.

FEATURES & BENEFITS

• Heavy duty 3/8” steel wire frame.
• Two mounting holes 1 2” apart for 5/16” dia. lag screw type fasteners 16” O.C., 12” offset to allow for handlebar clearance.
• Two tamper resistant 5/16” lag screws are included.
• 5/16” lag shield for concrete installations are included.
• Create additional space efficiency with 45˚ angle kit.
• Durable polyester powdercoat finish in several standard colors, silver, black, red, blue, or stainless steel finish.
• WallRack allows attachment of other bicycle gear such as helmets, gloves or other accessories.
• Protects the bike frame and finish.
• Allows clearance for pedestrian pathways or storage.
• Custom colors available upon request.
• Easy to install, simple to use.

MULTIPLE MOUNTING OPTIONS

• Mounting WallRack to wall studs on 16” centers is typical.
• Combine WallRack with 45˚ angle mounting brackets to increase pedestrian walkways.
• Transit Rack System available with stability strap mounted on a sturdy galvanized frame.
• Contact Cycle-Safe for additional multiple mounting options.
