1. Drywall & Wood Studs Installation:

A. Tools & Fasteners
- 3/8" Power Drill
- 1/8" x 3" Long Carbide Drill Bit
- T-30 Torx Bit
- (2) 5/16" x 2-1/2" Long Lag Screws Part #17505 (Included)
- Pencil
- Tape Measure
- Stud Finder
- Blue Line or Laser Level

B. Installation:
- a) Locate center of stud with Stud Finder for placement of first FattyRack
- b) Snap a line with the Blue Line or Laser and make a mark with pencil at approximately 60" from the floor to the first mounting hole position
- c) Hold rack straight and center hole over first mark position, the bottom hole and mark the upper hole at 12" center to center, which would be the 1st hole down from the top
- d) Remove the rack and drill approximately 2-1/2" deep into drywall and stud with 1/8" x 3" Drill Bit on center
- e) Align the rack with holes and using the Drill & T-30 Torx Driver screw the Lag Screws #17505 into the wall tightly
- f) Offset the next bottom rack hole down by 12" vertical and 16" center-to-center horizontal, depending on stud placement, yielding approximately 48" from the rack bottom hole to the floor
- g) Repeat steps "a" thru "g" completing on set of racks
- h) Repeat steps "a" thru "g" as necessary to complete the wall installation using a Blue Line or Laser Level

2. Concrete Wall Installation:

A. Tools & Fasteners
- 3/8" Impact Drill
- 1/2" x 3" Long Carbide Drill Bit
- 1/2" Hex Driver Bit
- (2) 5/16" Lag Shields Part #17504 (Included)
- (2) 5/16" x 2-1/2" Long Lag Screws Part #17505 (Included)
- Flat Head Screw Driver Bit
- Pencil
- Hammer
- Tape Measure
- Concrete Adhesive
- Blue Line or Laser Level

B. Installation:
- a) Locate center of hole placement of the first FattyRack
- b) Snap a line with the Blue Line or Laser and make a mark with pencil at approximately 60" from the floor to the first mounting hole position
- c) Hold rack straight and center hole over first mark position, the bottom hole and mark the upper hole at 12" center to center, which would be the 1st hole down from the top
- d) Remove rack and drill approximately 4" deep into concrete with 3/8" Hammer Drill
- e) Squirt in some Concrete Adhesive in both holes
- f) Insert the (2) Lag Shield #17504 into the holes and tap flush with the hammer
- g) Align rack and insert 1/4" x 7" Masonary Screws in holes and drill in place with 3/8" Impact Drill and 1/2" Hex Driver until tight
- h) Next offset the bottom rack hole down by 12" vertical and over 16" center-to-center horizontal, yielding approximately 48" from the rack bottom hole to the floor
- i) Repeat steps "c" thru "f" completing on set of racks
- j) Repeat steps "a" thru "h" as necessary to complete the wall installation using a Blue Line or Laser Level

Masonry & Brick Installation:

A. Tools & Fasteners
- 3/8" Impact Drill
- 3/8" Hammer Drill
- 1/2" Hex Driver Bit
- (2) Tapcon 5/16" x 3" Masonary Screws
- (1) Tapcon 1/4" x 7" Masonary Drill Bit
- Pencil
- Tape Measure
- Concrete Adhesive
- Blue Line or Laser Level

B. Installation:
- a) Locate center of hole placement of the first FattyRack on brick
- b) Snap a line with the Blue Line or Laser and make a mark with pencil at approximately 60" from the floor to the first mounting hole position
- c) Hold rack straight and center hole over first mark position, the bottom hole and mark the upper hole at 12" center to center, which would be the 1st hole down from the top
- d) Remove rack and drill approximately 4" deep into concrete with 3/8" Hammer Drill & Tapcon 1/4" Masonary Drill Bit on center
- e) Squirt in some Concrete Adhesive in both holes
- f) Align rack and insert Tapcon 5/16" x 3" Masonary Screws in holes and drill in place with 3/8" Impact Drill and 1/2" Hex Driver until tight
- g) Next offset the bottom rack hole down by 12" vertical and over 16" center-to-center horizontal, yielding approximately 48" from the rack bottom hole to the floor
- h) Repeat steps "c" thru "f" completing on set of racks
- i) Repeat steps "a" thru "h" as necessary to complete the wall installation using a Blue Line or Laser Level
