- Best suited for personal and office use

#15855 Key-In Code locker door with manually programmable keypad, master key override and internal egress. ADA Compliant.

Key-In Code

Stand-alone keypad lock

Master key override

ADA compliant

Lock option for:

ProPark Bike Locker Part #15855

FEATURES

- Standalone keypad lock with RFID capability
- Heavy duty commercial ANSI/BHMA Grade 1 – ideal for large enterprise and high traffic applications
- Multiple keyless access methods – keypad code and smart card
- 12 button backlit LED keypad
- Up to 800 user code and smart card combined capacity
- 8-digit master code
- Master key override
- Passage function for code free access
- Low battery indicator on keypad and app
- Zinc alloy body construction suitable for indoor
- Brushed steel finish

CONSIDERATIONS

- Not ideal for large scale deployments of bike lockers—can be tedious to program
- Administrator/Manager has to manually program new codes for every rental
- Setup is aimed at home or office use and is not ideal for public or on-demand usage
- For RFID use, an Open API interface is required for billing; potential development fee
- Monthly license fee of \$7.50 per lock
- Required to purchase first 100 codes in advance; fee for every 100 additional codes.
