

# Trilogy Lock for Smart Cards and PINs

Lock option for:

*ProPark Bike Locker Part #15600*

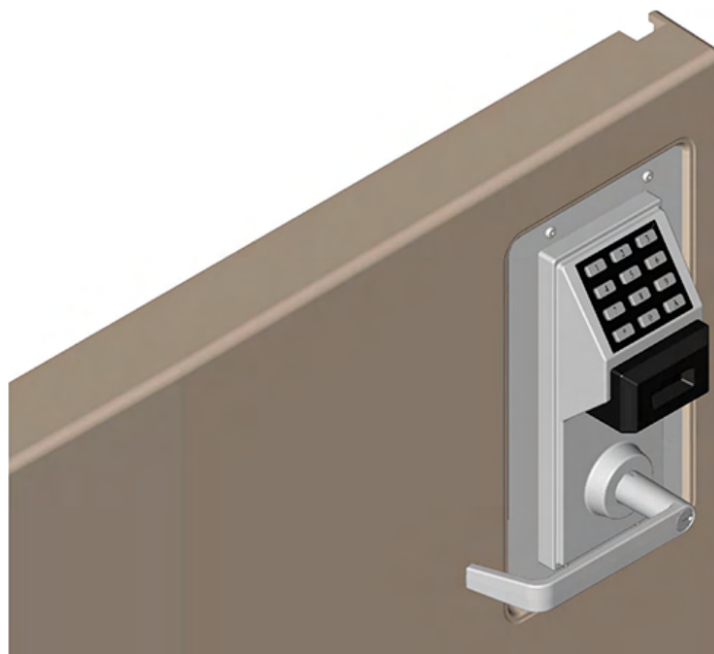

Provides restricted access for allocated use. The electronic access "Trilogy" wireless door lock allows for a reserved locker via a remote database. Proximity card or keypad entry.

Includes master key override

ADA compliant

## KEY FEATURES

- Trilogy Network Locks eliminate manual programming and provides audit trail retrieval by communicating wirelessly via Ethernet or 802.11B/G, with the Trilogy standalone lock's functionality.
- Networked to any non-dedicated Windows based PC with a Grade 1 wireless access lock per door, communicating to a single gateway to control up to 63 locks and installs in about an hour.
- This system allows a quick, easy, economical access system with advanced features such as automatic schedules, event logs and support for up to 2000 doors or 5000 existing Prox. ID Cards/ Badges with no wires, access panels or power supplies to buy or install.
- Trilogy Windows-based license free software included for user data/schedules, audit trails and lock programming, using a remote PC or laptop. Available with the CycleSafe Basic, Standard, Premium and Ultimate electronic access configurations.
- Features a real-time clock/calendar that automatically adjusts for Daylight Saving Time and allows for automated programming of events.
- Up to 5000 unique user codes can be added

**#15600** ProPark Door with Trilogy Lock by Alarm Lock (PDL 6100) with proximity Smart Card (HID) or PIN combination to replace T-Handle. Intended to provide restricted access for allocated use.

# Trilogy Lock for Smart Cards and PINs

Provides restricted access for allocated use. The electronic access "Trilogy" wireless door lock allows for a reserved locker via a remote database. Proximity card or keypad entry.

Lock option for:

*ProPark Bike Locker Part #15600*

Includes master key override

ADA compliant

## FEATURES

- Heavy-duty ANSI Grade 1 wireless key card door lock
- Cylindrical deadlatch locking mechanism
- Supports up to 5000 users via 3-6 digit PINs, or HID prox cards
- Compatible with any HID 125kHz prox cards 26-48bit
- Execute new network-wide capabilities including emergency priority global lockdown or unlock from any Network lock, or the network's PC
- Operates on (4) C size batteries that are included
- Unsurpassed 5-year+ battery life; no supplementary power supplies needed
- Wireless programming requires DL-Windows software (Download FREE at Alarmlock.com website) and Network Gateway
- Manage up to 63 locks per AL-IME2 gateway, and 2000 locks system wide using gateways and wireless expanders
- On demand user, and user group scheduling (500 timed schedule capacity)
- On demand audit trail reporting with time/date stamp (Prior 35,000 events)
- Offline programming may be done at the PDL6100's 12-button keypad, or prox card reader
- T2, and T3 Trilogy customers who maintain user and door information can continue to use their existing DL-Windows database to seamlessly manage Network. Add one new Network lock, or 2000 to existing system
- Uninterrupted Door Access Usage: Lock retains all programming and data even in the event of power outage or server offline occurrence
- Bi-directional communication using highest level of commercially available encryption (128-bit AES PC)
- Remote System Management: Accomplished with VPN/remote capability
- 1 Button remote release
- Weatherproof for installation in harsh settings
- Key override
